DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 5 recites the limitation "oxygen participating in the oxidation of the gas" in the end of the claim. There is insufficient antecedent basis for this limitation in the claim. There is no mention of any oxygen necessarily present in the reaction.

3. Claims 4-8 and 10-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites that "a gas capable of oxidizing" is in a "non-oxidizing atmosphere". The atmosphere must be oxidizing if it contains an oxidizing gas. Clarification is needed.

Allowable Subject Matter

4. Claims 4-8 and 10-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The prior art does not teach the oxidation of monosilane gas (SiH_4) to created a silicon *suboxide* at the low temperatures claimed.
